Final Project Ideas

- Aadi Patel

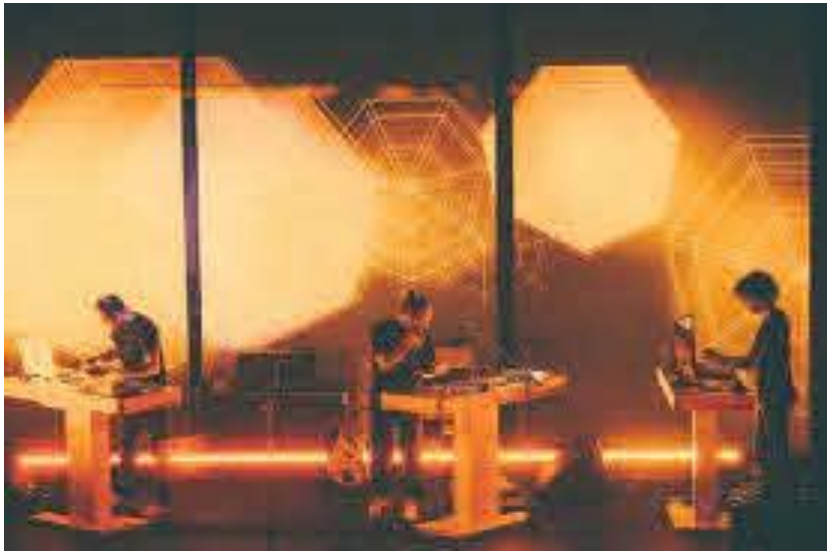
Interactive Live Stage Design

Use a Processing to make a program usable through Max MSP

Change moving visuals based on mood, rather than specific parameter

Inspired by Tarik Barri's work on Thom Yorke's tour

https://www.reddit.com/r/radiohead/comments/aje1i7/im_tarik_barri_and_i_make_live_visuals_on_stage



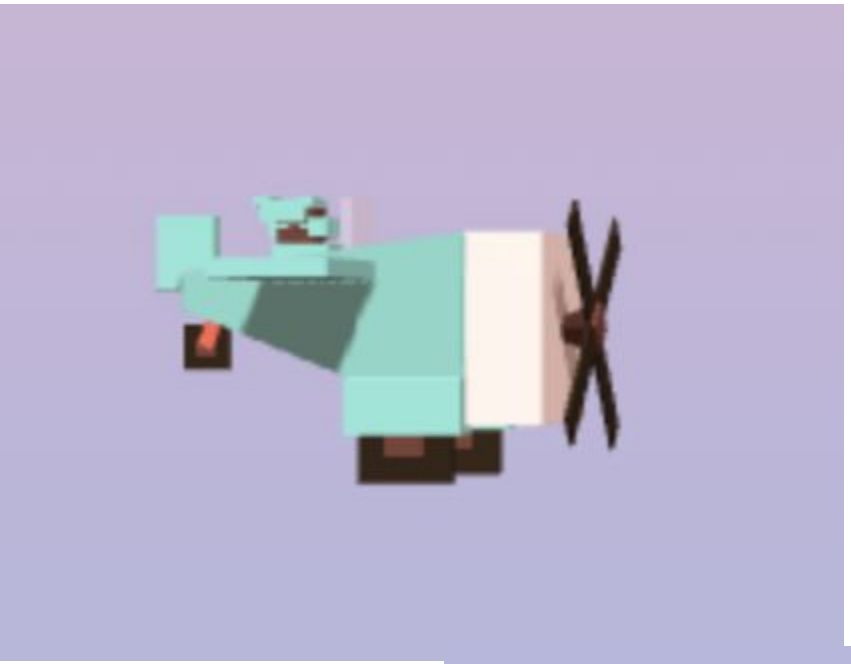
Trip through Mars

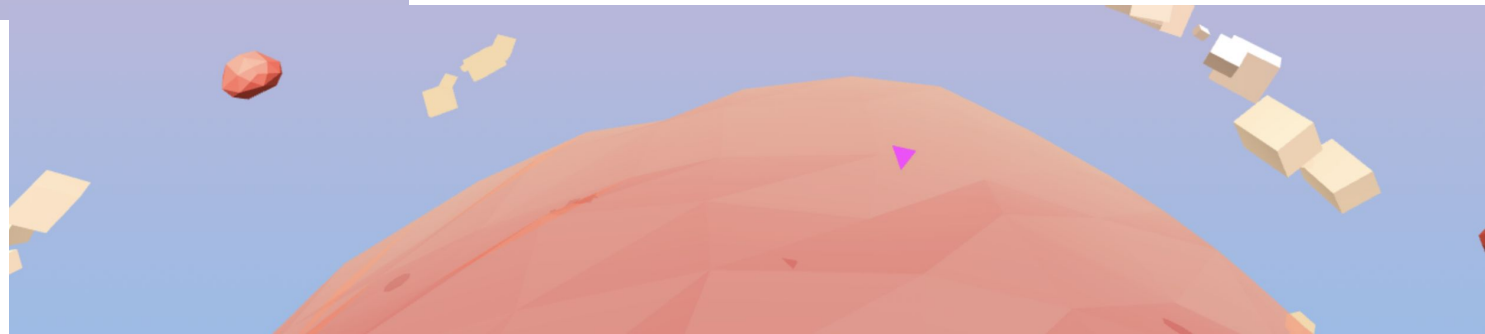
Moving game controlled by mouse

Revolves around flying an aeroplane over mars

Avoid asteroids, collect fuel to keep going

As the level progresses, aeroplane flies faster





Audio Manipulator

Code that creates music

Input one sound into the program, and it will create chord progressions

Able to change what chords come up based on mood, rather than chord theory

Loop function
